

# E-Commerce Sales Insights Dashboard

## Assets Documentation

### Purpose of Assets Folder

The Assets folder stores all visual and supporting files used for project presentation, GitHub showcase, documentation, and portfolio branding.

### Recommended Assets

- Dashboard\_Mockup.png
- Dashboard\_Overview.png
- KPI\_Cards.png
- Sales\_Trend\_Chart.png
- Category\_Analysis.png
- Region\_Analysis.png
- Customer\_Insights.png
- Product\_Insights.png
- PowerBI\_Cover\_Banner.png

### GitHub Usage

Use dashboard screenshots in README.md to improve project presentation. Include a cover image at the top of the repository and place supporting visuals throughout the documentation.

### LinkedIn Usage

Upload dashboard screenshots, KPI cards, and overview images when sharing the project on LinkedIn. Highlight key business insights and include the GitHub repository link.

### Folder Structure

## **Asset Creation Guidelines**

Use a professional corporate theme with blue, white, and gray colors. Maintain consistency across screenshots and visuals. Ensure all images are high resolution and suitable for GitHub and LinkedIn portfolio presentation.

## **Conclusion**

The Assets folder improves project credibility and helps recruiters quickly understand the dashboard's functionality and business value.
